

## Bag End Debuts CD-15 Speaker

04.08.2013

Lake Barrington, IL, (April 8, 2013)—The first entry in Bag End's new Venus series of performance loudspeakers is the CD-15.

It is a lightweight 70-lb., professional, full-range, 15-inch two-way loudspeaker with bi amp crossover, offering a max. peak SPL of 135 dB. The speaker enclosure is made of 15mm 11-ply birch plywood with black RoTex finish; and includes fly points, handles, a stand adapter, and black powder-coated grille.

The CD-15 is available as an active bi-amped crossover version or passive crossover version. The CD-15 features Bag End's Time-Align technology and is available as an active bi-amped crossover version or passive crossover version.

The CD-15 system components include:

Low Frequency Transducer: E-15F 15-inch cone / 2.5" voice coil / Neodymium magnet

High Frequency Transducer: E-806 1.4" Exit Neodymium compression driver / CD controlled directivity waveguide

Input Connectors: dual Neutrik Speakon

Directivity: 90° x 60°, rotatable horn
