

# TA6002-I TIME-ALIGN®

## APPLICATIONS

Audio-Visual Installations	House of Worship Installations
Front Fill for Large Systems	Restaurant Foreground Music Systems
Auditorium Under Balcony Fill	Sports Facilities
Nightclub Installations	Surround Sound Systems

## DESCRIPTION

The TA6002-I produces high definition high impact sound over its wide angle making audience coverage easy and effective in a variety of venues. A compact loudspeaker, engineered for exceptional mid field and near field performance it is well known for exceptional fidelity and its surprisingly high output capability.

Useful for foreground and background music applications, it also excels for speech projection and small PA systems. With its fidelity, size and output its perfect for multi channel 5.1 presentations systems. In larger audio systems the TA6002-I is highly effective as a fill, delay or under balcony speaker. The addition of a Bag End subwoofer will expand its capabilities for more demanding applications.

Rotatable high frequency waveguide, universal fly points and yoke mounting allow the TA6002-I to be easily installed and aimed in a multitude of applications.

## SPECIFICATIONS

### System Type:

2-way vented 0.6 ft<sup>3</sup>

### Enclosure:

15 mm 11-ply birch plywood

### Finish:

Black Ro Tex™ True water born environmental finish

### Grille:

16 Gauge black power coated perforated steel

### Low Frequency Components:

E-700 1" Exit compression driver,  
1.8" Titanium diaphragm, 15 oz. Magnet,  
Radial Waveguide

### High Frequency Components:

E-700 1" Exit compression driver,  
1.8" Titanium diaphragm, 15 oz. Magnet,  
Radial Waveguide

### Input Connector:

Cinch 142 screw terminal barrier strip

### Hardware:

Optional Steel Yoke  
Model: Yoke-3

### Fly Points Safe Working Load:

100 lbs Upper most rigging points

### Crossover Type:

Passive Time-Align® equalizer type at 2.1 kHz

### Time Offset Between Driver:

< ± 25 Microseconds

### Sensitivity:

95 dB SPL (2.83 V @ 1m)

### Frequency Response:

95 Hz to 20 kHz ±3 dB

### Low Frequency Limit:

80 Hz

### Maximum Calculated Continuous Acoustic Output:

120 dB SPL @ 1m

### Power Handling:

180 W continuous (IEC)  
360 W program

### Recommended Amplifier Power:

180 to 360 W at rated impedance

### Rated Impedance:

8 Ohms

### Coverage Pattern:

80 degrees Horizontal (-6 dB)  
60 degrees Vertical (-6 dB)  
Rotatable horn

### Recommended High Pass Filter:

80 Hz

### Polarity:

A positive asymmetrical signal applied to the + terminal will result in a positive asymmetrical acoustical pressure

### Dimensions:

22.5" h x 9" w x 11" d  
58 cm x 23 cm x 28 cm  
Trapezoidal – 10 degree taper per side

### Weight:

27 lbs  
13 kg

### Custom Finishes:

Optional custom finishes include white, unfinished ready to paint and outdoor weather treatment.

### 70/100/140 Volt Operation:

Optional 60 Watt taped internal transformer

# TA6002-1 TIME-ALIGN®

## ABOUT TIME-ALIGN® TECHNOLOGY

Time-Align® assures that the fundamental and overtones of a complex, transient, acoustical signal are presented to the listener in the same relationship as the electrical signal at the input terminals of the loudspeaker. The conventional loudspeaker spreads out the sound in time. When a rapid series of transients occur the results are blurring and lost detail. With Time-Align®, a transient is presented as a tight package of energy, with the same time relationships as the natural sound. This means that a rapid series of transients will be heard clearly.

True Time-Alignment™ requires much more than just physically lining up the loudspeaker components. It

requires consideration of the driver placement, driver delay and adjustment of the crossover delay parameters. This achieves the precise simultaneous acoustical arrival time of each driver throughout the crossover region.

The first Time-Aligned™ Loudspeaker was invented by EM Long Associates in 1976 utilizing the Time-Align® generator invented and built by Ronald Wickersham. In 1980 Bag End® incorporated Time-Align® technology into our full range loudspeaker systems. Along with state-of-the-art laboratory instruments, the proprietary Time-Align® generator is still in use today to verify the time domain performance of our loudspeaker systems. When comparing a genuine Bag End® Time-Aligned™ loudspeaker system to any other, our technology and design is easy to hear and appreciate. The dramatic clarity, realism, and overall pleasant sound of our Time-Aligned™ systems are well noted worldwide.

innovative acoustical designs into their products. The ground breaking introductions of the Time-Align® and ELF™ Technologies into sound reinforcement and studio monitor loudspeakers in the 1980's was followed by Minima One™ self-powered systems and the highly unique E-Trap™, electronic bass trap. Over the decades, Bag End® has been a leader in providing uniquely good sounding products and extraordinary service to our customers world wide.

## ABOUT BAG END® LOUSPEAKERS

Bag End loudspeakers began in 1976 in a small shop by people dedicated to the pursuit of making high quality loudspeaker systems. Over the decades Bag End® has employed the very best construction techniques and
