**PAF1B-R**  
**TIME-ALIGN**

**SELF-POWERED**

---

**APPLICATIONS**

- Portable Sound Reinforcement
- Drum Monitor
- Portable Audio-Visual Systems
- Electronic Keyboards

---

**DESCRIPTION**

The PAF1B-R is a self-powered Minima One™ full range, portable loudspeaker system offering both high fidelity and high efficiency. The Time-Aligned™ studio quality sound provides detail and clarity not found in other designs. The PAF1B-R is made from durable birch plywood with a black Ro Tex™ finish and includes a stand adapter and recessed handles.

The internal Minima One™ amplifier incorporates a high efficiency low power consumption green design with advanced digital switching to automatically accept any line voltage from 88 to 270 volts. Low voltage contacts are provided for installations to remotely turn the amplifier on and off.

---

**SPECIFICATIONS**

**System Type:**
3-way vented 5.5 ft³

**Enclosure:**
18 mm 13-ply birch plywood

**Finish:**
Black Ro Tex™ finish

**Grille:**
16 Gauge black power coated perforated steel

**Low Frequency Components:**
E-18A Transducer, 3" Voice coil, 80 oz. Magnet

**Mid Frequency Components:**
SE-1280 Transducer, 2.5" Voice Coil, 80 oz. Magnet

**High Frequency Components:**
E-700 1" Exi compression driver, 1.8” Titanium diaphragm, 15 oz. Magnet, Radial Waveguide

**Input Connector:**
XLR 1/4” combo with XLR loop through

**Internal Amplification:**
Minima One™

**Input Impedance:**
48K Ohms

**Input CAL Sensitivity:**
+4 dBu

**Maximum Continuous Amplifier Power:**
1350 W into 4 Ohms

**High Pass Filter:**
Switchable: -6 dB @ 8 Hz; @ 50 Hz; @ 95 Hz

**Overload Protection:**
Internal limiter

**LED Indicators:**
Green - On  
Yellow - System limit  
Red - System fault or sleep mode

**Mains Voltage Requirements:**
Auto sensing  
Universal voltage range  
88 Volts minimum to 270 Volts maximum

**Mains Current Requirements:**
4.6 Amps @ 120 Volts  
2.3 Amps @ 240 Volts

**Hardware:**
8 - Recessed handles  
2 - 3 1/2” Rigid casters

**Crossover Type:**
Passive Time-Align™ equalizer type @ 2.5 kHz and 125 Hz

**Time Offset Between Driver:**
< ± 25 Microseconds

**Frequency Response:**
40 Hz to 20 kHz ±3 dB

**Low Frequency Limit:**
35 Hz

**Maximum Calculated Continuous Acoustic Output:**
127 dBSPL @ 1m

**Coverage Pattern:**
80 degrees Horizontal (-6 dB)  
60 degrees Vertical (-6 dB)  
Rotatable horn

**Polarity:**
A positive asymmetrical signal applied to pin 2 will result in a positive asymmetrical acoustical pressure

**Dimensions:**
43.5”h x 22”w x 18”d  
111 cm x 56 cm x 46 cm

**Weight:**
143 lbs  
65 kg

**Custom Finishes:**
Optional custom finishes include white or unfinished ready to paint.

TIME-ALIGN®, TIME-ALIGNED™ and TIME ALIGNMENT™ are trademarks of E.M. Long Associates. MINIMA ONE™ is a trademark of Modular Sound Systems, Inc., BAG END® is a registered trademark of Bag End, Inc.
ABOUT TIME-ALIGN® TECHNOLOGY

Time-Align® assures that the fundamental and overtones of a complex, transient, acoustical signal are presented to the listener in the same relationship as the electrical signal at the input terminals of the loudspeaker. The conventional loudspeaker spreads out the sound in time. When a rapid series of transients occur the results are blurring and lost detail. With Time-Align®, a transient is presented as a tight package of energy, with the same time relationships as the natural sound. This means that a rapid series of transients will be heard clearly.

True Time-Alignment™ requires much more than just physically lining up the loudspeaker components. It requires consideration of the driver placement, driver delay and adjustment of the crossover delay parameters. This achieves the precise simultaneous acoustical arrival time of each driver throughout the crossover region.

The first Time-Aligned™ Loudspeaker was invented by EM Long Associates in 1976 utilizing the Time-Align® generator invented and built by Ronnald Wickersham. In 1980 Bag End® incorporated Time-Align® technology into our full range loudspeaker systems. Along with state-of-the-art laboratory instruments, the proprietary Time-Align® generator is still in use today to verify the time domain performance of our loudspeaker systems.

When comparing a genuine Bag End® Time-Aligned™ loudspeaker system to any other, our technology and design is easy to hear and appreciate. The dramatic clarity, realism, and overall pleasant sound of our Time-Aligned™ systems are well noted worldwide.

ABOUT MINIMA ONE™

The Minima One™ is both a high fidelity and a high efficiency amplifier. With efficiency well over 80%, the Minima One™ provides more power to the loudspeakers and creates less heat in the amplifier. In real world applications there is practically no heat emitted from the amplifier and thus it requires no cooling fan.

Incorporating patented technology the comparison circuit of the Minima One™ corrects every single cycle to drive error to zero at the end of each cycle. On average, every 4 microseconds, the one cycle modulator transforms and amplifies the input signal into the ideal natural pulse width modulation. Switching at 250 kHz with the single cycle error correction insures extremely low distortion and high reliability. The power factor corrected AC power input, automatically and continuously adapts to any voltage between 88 and 270 volts. The Minima One™ is convenient and stable to operate on any power grid in the world.

ABOUT BAG END® LOUDSPEAKERS

Bag End loudspeakers began in 1976 in a small shop by people dedicated to the pursuit of making high quality loudspeaker systems. Over the decades Bag End® has employed the very best construction techniques and innovative acoustical designs into their products. The ground breaking introductions of the Time-Align® and ELF™ Technologies into sound reinforcement and studio monitor loudspeakers in the 1980’s was followed by Minima One™ self-powered systems and the highly unique E-Trap™, electronic bass trap. Over the decades, Bag End® has been a leader in providing uniquely good sounding products and extraordinary service to our customers world wide.
