\*Optional yoke available for these cabinets.

**SUBWOOFERS DO NOT COME STANDARD WITH FLY POINTS.** To order fly points on subwoofers add F2, F4, F6, or F8 to the end of the model number. For example: To add 4 fly points to the S18E-I you would add an F4 to the end of the model number so it becomes S18E-IF4. See accessories on page 4 for additional cost.

**NON PROCESSED POWERED SUBWOOFERS** are available and useful in larger systems. For example, the PS18E-I is a powered but not internally INFRA processed system. In larger systems of 4 or more powered subwoofers, it is economical to drive the powered subwoofers with a line level Infra processed signal from a rack mounted INFRA-MXB processor. Subwoofers do not come standard with fly points. See Accessories on page 4 for fly point options and cost.
