*Optional yoke available for these cabinets.

SUBWOOFERS DO NOT COME STANDARD WITH FLY POINTS. To order fly points on subwoofers add F2, F4, F6, or F8 to the end of the model number. For example: To add 4 fly points to the S18E-I you would add an F4 to the end of the model number so it becomes S18E-IF4. See accessories on page 4 for additional cost.

NON PROCESSED POWERED SUBWOOFERS are available and useful in larger systems. For example, the PS18E-I is a powered but not internally INFRA processed system. In larger systems of 4 or more powered subwoofers, it is economical to drive the powered subwoofers with a line level Infra processed signal from a rack mounted INFRA-MXB processor. Subwoofers do not come standard with fly points. See Accessories on page 4 for fly point options and cost.
